Prostate problems can range from something minor like prostate enlargement to more major issues in your prostate. Customers tend to experience frequent urination urges at random times, leading to disruptive sleep at night, pain and burning while peeing, etc. Below are the 12 common signs/symptoms that should not be ignored in order to prevent the development and progression of more severe prostate problems. These include:

- Noticeable burning while urinating or during ejaculation
- A frequent need to urinate
- Blood in urine
- Blood in semen
- Pain in the bones
- Erectile dysfunction
- Difficulty starting or stopping a stream of urine
- Inability to urinate standing up
- Weak or decreased flow in your urinary stream
- Difficulty starting urination or a need to hold back while urinating
- Pain and discomfort in the pelvic area, lower back or upper thighs
